Actuarial Analyst

Fast approaching 800 staff as a growing business there are many opportunities for career progression

A Company built on excellence, first class customer service and a burning desire to be the Insurer of choice in Australia

End to end business involvement in an Actuarial Department that utilises rich data and Industry leading techniques

About Us

A little over 5 years ago Youi Insurance did not exist and the concept of establishing a fun, creative and innovative Insurance company, one that was rewarding for employees and clients alike, was just a dream. With the support of our umbrella company OUTsurance (RMI Group, South Africa), day-by-day, month-by-month we have chipped away at our business goals to achieve some remarkable results. With the business growing at break-neck speed, it is essential that we structure our Actuarial Department to best support our people, exceed our financial goals and assist in delivering the ultimate customer experience. Accordingly, a new opportunity for an Actuarial Analyst has been created.

No other actuarial employer in Australia offers the same end-to-end exposure to insurance operations. At Youi, you see the work you do directly add value in the business with a focus on quick turnaround of quality results. Youi was founded by actuaries and bases its operations on actuarial principles. From reinsurance and capital, through reserving and claims analysis, pricing and product development, to operational analysis and modelling; the actuarial department is central to Youi's operations.

The actuarial department has wide and deep industry experience, with team members involved closely in industry debates around matters such as flood insurance, disaster management and capital requirements. The team has considerable experience implementing cutting edge techniques relating to modelling and data management.

But note, if you want to be pigeon-holed doing the same thing all the time, Youi is NOT the company for you! This is a rare opportunity for the right candidate to become involved in a vast range of tasks not typically allocated to a recent graduate.

About You

As a hands-on Actuarial Analyst, you will be a recent graduate with up to two years experience. You can expect to be dealing with people from right across the organisation from the CEO to Call Centre Advisors.

You will be involved in various aspects of the actuarial control cycle across many parts of the insurance operations, not just pricing and reserving. You will also be encouraged to identify opportunities for continuous improvement and enhancements of all aspects of the business. Most of all, you will revel in the opportunity to implement improvements in the industry-leading systems based on your ideas and analysis.

You will have an outgoing and approachable persona and be a committed team player. Degree qualified in Actuarial or related studies with progress in subsequent exams since graduating, your academic transcript will shine brightly to illustrate your ability to learn, understand and apply actuarial techniques.

Please send enquiries or apply by sending your resume and cover letter to Candice Joseph cjoseph@youi.com.au titled - Actuarial Analyst.
