

QBE is one of the top 20 global general insurers and is recognised as Australia's largest international insurance and reinsurance company, with operations in 42 countries.

We currently have an opportunity available to join our Actuarial team within our Australian and New Zealand Operations for an experienced Actuarial Manager. You will be joining QBE during an exciting period of our evolution.

This is an important role that offers exposure to the CEO and executive team and will be primarily responsible for a full range of Actuarial support by leading and managing a team of actuaries in the fulfillment of its obligations in relation to pricing monitoring, valuation and internal consulting.

Responsibilities include but will not be limited to:

- Monitoring the results of a diverse range of products, including Workers Compensation, Credit and LMI classes
- Assisting in the development of strategy and business direction by contributing to financial planning by forecasting revenue and by determining levels of provisions and reserves sufficient to meet future liabilities
- Demonstrating innovative and strategic thinking on actuarial aspects of business unit and/or legislative issues/problems
- Leading, managing and undertaking complex or major pricing/underwriting analysis at the strategic level
- Making a significant contribution to QBE Australia New Zealand's strategic market directions, policies, structures and strategies
- Advising on reports of strategic significance and presenting on them through to CEO level
- Managing client relationships at business unit manager level on key strategic issues

To secure this challenging and exciting opportunity you must possess the following skills and experience:

- Advanced knowledge of the insurance industry, existing products and competitor products
- Authoritative knowledge of a major business unit or industry segment
- Ability to present proposals and solutions at a strategic level
- Strong communication and influencing skills
- Demonstrated management experience
- Exceptional analytical skills
- Qualified FIAA or equivalent and typically minimum 6-10 years post-qualification actuarial experience in general insurance
- Degree in Mathematically focused area

QBE recognises and supports a range of flexible work arrangements to promote a better family/life/work balance.
