

Actuaries Managing Risk – Insights

Enhancing Super Fund Risk and Capital Management - Practical Considerations

Presented by: Ben Facer, Peter Larsen and Tim Gorst

Wednesday 25 September 2013
12.00pm – 2.00pm
Actuaries Institute
Level 7, 4 Martin Place, Sydney 2000

Sydney

Stronger Super is the biggest change in 20 years since superannuation became compulsory and has overhauled the governance required around managing a super fund. In particular, new requirements to strengthen risk management (SPS220), enhance the financial management of DB funds (SPS160), and hold capital against operational risk (SPS114) have been in place since 1 July 2013.

This session explores some considerations for trustees wanting to ensure the recent changes are linked together to deliver practical changes that ultimately benefit outcomes for their members.

About the presenters

Ben Facer, Peter Larsen and Tim Gorst are all Fellows of the Actuaries Institute, working in the Australian superannuation industry.

Ben is a Principal at Deloitte Actuaries & Consultants. He has been working in the superannuation consulting industry for almost 20 years, covering all aspects of a fund's operations, including strategy governance, actuarial and administration.

Peter is also a Principal at Deloitte Actuaries & Consultants. He has over 14 years experience in insurance, superannuation and investments, working in many areas of the financial services industry.

Tim is responsible for the delivery of pricing and actuarial services to NAB's corporate and institutional wealth business. He has almost 20 years financial services experience across banking and wealth management with the NAB Group.
