

Requesting a visit

We've written some copy to help you with your initial contact with the school.

If you have a contact on staff at your selected school, reach out directly to them.

If you have a local school in mind, and no current contact, we recommend either calling the School Reception or emailing.

Dear [Head of Mathematics / Careers Adviser]

My name is [] and I am a [Fellow] of the Actuaries Institute of Australia. I also have a close association with [] school as I [used to attend / my daughter went to this school / I live in the area etc]. I currently work at [company] as an actuary doing [].

The Actuaries Institute is the professional body for actuaries in Australia. Actuaries are a small but highly influential profession for people with strong STEM and maths backgrounds. We do exciting work in helping governments to set public policy, in helping financial services companies to provide sustainable products to Australians and in helping other industries such as aviation and retailing to optimise their services and products.

Our Institute wants to inspire high school students about the possibilities in a maths / data science / actuarial career. I would appreciate the opportunity to speak with your students (particularly your maths students from Year 10 to 12) to introduce them to the actuarial profession and the wealth of opportunities available.

Please let me know by return email if this would be of interest and, if so, who I should contact to discuss a suitable date.

We believe this could be both inspiring and fun for your students.

I look forward to hearing from you.

Regards,
[name]
